CliptoPro CliptoPro Binary Distribution Authorisation

expand all collapse all

[–] to **CliptoPro** sent 2 days ago

I am building a Chocolatey (<http://www.chocolatey.org>) installation package for Clipto Pro at present. If you are unaware Chocolatey is a Windows package manager which supports deploying a piece of software from a single deployment artifact along the same lines as say apt or yum for Linux.

Packages can be built using a remote fetch of required resources at runtime or embedding the install files as part of the package.

I would prefer to do the latter but in the absence of an appropriate license require your authorisation to do so.

With this being the case I would appreciate if you could review my request and provide your authority to include binary distributions of Clipto Pro in Chocolatey packages, specifically the Windows NSIS packages and the Windows zip packages from your Github releases page (<https://github.com/clipto-pro/Desktop/releases>).

Many thanks

David

Hi!

The binaries of the app contains only NSIS package for Windows platform. Zip archive contains macOS binaries.

I approve the possibility to distribute windows binaries via chocolatey but keep in mind that zip archives in our repository are reserved for macOS builds.

Thanks!
